RR-5.3: MULTIVALVE BLOCK (pg 1 of 2)

Removal

- 1. Move Probe over Wash Station.
- 2. Remove Buffer Bottles with tubing:
 - a. Disconnect Buffer Tubing at Multivalve Block.
 - b. Remove Buffer Bottles with Tubing attached.
- 3. Remove Syringes from Multivalve Block (RR-5.10/5.12):
 - a. Unscrew Syringes from block.
 - b. Push Drive Block down 1 inch (2.54 cm).
- 4. Remove thumbscrew from center of Multivalve Block. Pull block from analyzer.

Replacement

- 1. Verify that tang inside Multivalve Block and slot in the pump extender shaft are aligned.
- 2. Verify that the mark on tang is toward Syringe connection.
- 3. Install Multivalve Block with Syringe connectors pointing down; secure with thumbscrew.

NOTE: Multivalve Block should be flush with Pump overplate to indicate that tang is completely engaged into pump extender shaft.

4 - 61

- 4. Install Syringes.
- 5. Install Buffer bottles: INACT_DIL buffer bottle on left Buffer Platform, SYS_DIL buffer bottle on right Buffer Platform.
- 4 Removal & Replacement Procedures RR-5.3: Multivalve Block LCx® Analyzer Service Manual (Text P/N 47278-102)
 - Cox Analyzer Service Mandai (Text F/N 47276-102)
